REDUCING LANDFILL

Keeping garments for longer is probably the single best thing we can all do to help reduce global textile landfill.

To help encourage this we are planning to add a lot more care information on our website to help and encourage our customer to look after their products in order to keep them in good working order for as long as possible. This will include information on repair as well as wash care for example.

SUSTAINABLE MATERIALS

We are moving more of our polyester into recycled polyester, polyamide and using materials like organic cotton. We are increasing the overall percentage of our collection and will continue on this journey.

COMMUNITY SUPPORT

We have supported Children's Adventure Farm Trust, CAFT, over the past 5 years. CAFT is a charity for terminally ill, disabled and disadvantaged children in the North West. Set in the heart of the Cheshire countryside, the 17th century Farmhouse is set in 10 acres of land and is the perfect place for deserving children for all abilities to play, laugh and simply enjoy being children. Whether the children are at the Farmhouse for a day or for a few days, there is an amazing array of things to see and do.

CARBON FOOTPRINT

We are looking at reducing sea transportation from raw material manufacturers to garment manufacturers by sourcing materials (recycled wherever possible) in each manufacturing location This not only reduces our carbon footprint but also will save approx.

15 days transportation time, customs red tape and cost. With regard to the next stage, we are currently in discussions with a couple of external companies which includes the possibility of providing fully recyclable products.

SHIPPING BAGS PROJECT

We have completed a complete overhaul of our plastic shipping bags for all products. These are the bags used from factory to shop floor. 600k bags used across the group, which amounted to 15,000kg of plastic. There were 34 different bag sizes used across 15 suppliers. By reducing sizes of the bags we were able to save 42% on overall plastic usage. We now have one source for 100% recycled & recyclable bags.

FAIR WEAR FOUNDATION

Ronhill is a member of Fair Wear Foundation (FWF) since 2016. Together FWF and Ronhill are working to achieve fair working conditions worldwide.

WOMEN'S TECH

The Ronhill Tech collection reflects the scrupulous detail behind Ron's iconic products and world leading performances, and is only focused on delivering kit with an edge over everything else.

These are our most celebrated and technically advanced products made with premium fabrics and innovative features, with the purpose of solving the functional needs of a runner, whether you know them yet or not.

Without compromise, Tech combines the sentiment of the brands 50+ year heritage in technical performance clothing with modernity, form and function.

WOMEN'S LIFE

The Life category is designed for the necessities of travel, rest and recovery.

The design brief embraces the universal life of a runner whether that's travelling to training sessions or races, and for the much-needed resting & recovering work after your work is done.

Running is practiced, is a shared goal amongst many, and a way of doing things that produces pleasure and peace. This is at the heart of the Life collection. Running isn't a sport it's a way of life.

MEN'S LIFE

The Life category is designed for the necessities of travel, rest and recovery.

The design brief embraces the universal life of a runner whether that's travelling to training sessions or races, and for the much-needed resting & recovering work after your work is done.

Running is practiced, is a shared goal amongst many, and a way of doing things that produces pleasure and peace. This is at the heart of the Life collection. Running isn't a sport it's a way of life.
